

Wayne Milera

Wayne was drafted from Central District in the SANFL, having played 11 senior games for the season, including two finals. He also played all six games for South Australia at the Under 18 National Championships and was part of Port Adelaide's Indigenous AFL Academy.

Wayne was diagnosed with Wolff–Parkinson–White syndrome after completing ECG and cardiac tests with the South Australian Under-18 program and underwent heart surgery. Just a week later he kicked 3 goals in a semi-final to help Centrals to a thrilling win.

Wayne debuted for the Adelaide Football Club in round 1, 2016 after being drafted in the 2015 AFL National draft. After playing in the opening four rounds of his debut season he suffered an injury and missed the next three rounds. He returned in round eight against Geelong and then in round nine against Gold Coast, Milera kicked three goals.

After the round 10, 2017 match against Fremantle, in which he recorded sixteen disposals, four tackles and three goals, he was the round nominee for the AFL Rising Star.

In the 2018 season, he was moved to the half-back line as a replacement for the injured Brodie Smith. In Adelaide's round 6 victory over the Gold Coast Suns he collected a career-high 33 disposals.
